

Hungate Garden Project

We have had two working days since the last newsletter, with fantastic help from local families. Many thanks to Sue, Andy, Kian, Laura, Emma, Eva, Marrienne, Robert, Daniel, Sophie and Annie.

We have completely cleared all the building materials off the playground ready for the start of the new term.

The second raised bed has been completed and paving laid. Gravel completes the area up to the fence.

Timber has been sawn for the second set of raised beds.

We have made a start on the construction of the pond. This will have a small area of open water, about 9 – 12 inches deep, with a larger area of boggy planting to the side. Great to see a new generation of landscape gardeners coming through.

Andy did a fantastic job of driving a hole through 2 feet of concrete and bedrock for the first of the support posts of the greenhouse.

Our next working day will be Sunday 16th September.

We will try to get a power tool on site to get the other 3 support posts in place.

If you can lend a hand on Sunday, between 10am and 4pm, we would be very grateful for the help.
