

Hungate Garden Project

Only Chris and I were able to work on the garden last Sunday, so not much to report.

We did manage to complete the floor of the greenhouse. This is made from a reused tarpaulin and reclaimed pavers, cemented between the uprights, to create a solid base for the plastic bottle walls. Our aim is to use as much reclaimed material in the garden as possible.

Year 5 at the school are doing a project on recycling, so they are to be given the task of encouraging students to collect the 1500 2l clear plastic bottles that we need. When we have enough bottles, we hope as many of them as possible will help with putting the greenhouse together.

Our next working days will be Sunday 21st October, Monday 29th and Wednesday 31st (during half term) and Sunday 4th November. Lets hope that the weather will be kind.

If you can lend a hand on any of these days, between 10am and 4pm, we would be very grateful for the help.
