

Hungate Garden Project

Great progress over the last couple of weeks, despite some foul weather. The frame for the bottle greenhouse is now complete. The pitched roof and the door were the last awkward jobs, but it is now ready for the bottles to be attached. We hope to involve the school students working on this once enough bottles have been collected.

More bricklaying on the path edges and the bed filled with soil.

It is beginning to look more like a garden and less like a building site.

This bed will be filled with bee-friendly shrubs and sensory plants.

The last paving slabs around the raised beds have also been laid.

A start has been made at laying out the course of the pathways to the stage area.

This may well all change when we come back to look at it with fresh eyes.

Our next working day will be Sunday 16th Dec. The last before Christmas.

If you can lend a hand, between 10am and 3pm, we would be very grateful for the help.
